Retraction: Role of cytochrome P450 in drug interactions

Zakia Bibi

This article [1] has been retracted by the Editor because of extensive overlap with a previously published work [2]. The article was submitted by three authors, two of whom subsequently withdrew their names from the article. Despite efforts to contact the original submitting authors and to get their institution at the time of submission to initiate an investigation, we have been unable to establish how far the remaining author was aware of the submission.

Submit your next manuscript to BioMed Central and take full advantage of:

- Convenient online submission
- Thorough peer review
- No space constraints or color figure charges
- Immediate publication on acceptance
- Inclusion in PubMed, CAS, Scopus and Google Scholar
- Research which is freely available for redistribution
